Overview

Apatar On-Demand Edition is a hosted, on-demand solution for data synchronization between your Salesforce and QuickBooks. It was designed for business users, so the process of setting up the integration link does not require technical skills.

Apatar On-Demand Edition for Salesforce and QuickBooks allows running one- or two-way, one-time or continuous synchronization of account, contact, order and opportunity data, while preserving links between tables in both Salesforce and QuickBooks. It ensures scalability and stable performance regardless of the amount of data or number of synchronization jobs you could be running at the same time.

PREBUILT INTEGRATION		
Salesforce	↔	QuickBooks
Accounts	↔	Customer
Opportunity	↔	Job
Opportunity	↔	Sales Order
Opportunity	↔	Invoice
Opportunity	↔	Estimate
Product	↔	Item

Benefits

- Customization

About Apatar

Apatar is the leading provider of on-demand data integration solutions with open source code. Since the first release of the Apatar Community Preview in 2007, companies such as Alcatel-Lucent, Allianz, Autodesk, British Airways and thousands of others have trusted and leveraged Apatar to integrate data between on-premises and on-demand systems and applications.

Apatar is currently used by more than 2500 organizations and individuals worldwide.

With powerful data integration capabilities, Apatar enables its users to easily link information between various CRM and ERP systems, email systems, FTP servers, and document management repositories.

Apatar, Inc. is headquartered in Western Massachusetts. For more on Apatar, please visit <http://apatar.com> or <http://apatarforge.org>.
